## WHO WE ARE:

Alfaprotec is a company formed by electrical engineers dedicated to providing advice and consultancy to companies who work in the electricity sector, such as generators, transmitters, distributors and large industries whose size and structure need support in making decisions in the Electric Power Management.

## SERVICES:

We offer advice to our clients at all stages of their projects, so that in the beginning these are properly designed, can then be developed smoothly and the final stage of implementation they do meet all expectations.

We develop all kinds of studies for Electric Power Systems in high, medium and low voltage, as well as programming, testing and commissioning of protection systems.

## OUR CAPABILITIES:

We have over 20 years experience in the field of Electrical Power Systems conducting studies, analyzing anomalies and failures, by testing the protection systems, advising clients and developing specific consultancies.

Our experience allows us to work with all kind of equipment such as electromechanical, analog and digital devices, generating all the data required by our customers' equipment.

We have the software used in major companies in the electric field for the development of the studies that we are requested.

INGENIERÍA ELÉCTRICA LTDA.

## EXPERIENCE:

Throughout our careers we have participated in:

- ▶ Low voltage electrical projects for major industries.
- ▶ Studies for medium voltage feeders in many distribution companies.
- ▶ Studies of systems for generating and transmission companies.
- ▶ Studies of plant protection up to 400 MVA.
- ▶ Testing and commissioning of systems of various manufacturers protections.
- ▶ Visits to factories protections systems.
- ▶ Studies for major companies such as Arauco, Chilectra, Transnet, Chilquinta, CGED, Saesa, STS Frontel, Luzlinares, Enlasa, Cen, etc.
